

MMSU's Commitment

Take an active role in protecting and promoting sustainable use of terrestrial ecosystems, responsible land use, and biodiversity conservation.

SDG 15.3.3 · Local biodiversity included in planning and development

Include local biodiversity into any planning and development process (e.g. construction of new buildings).

Evidence year: 2025 (calendar year), with continuing implementation 2024–2026

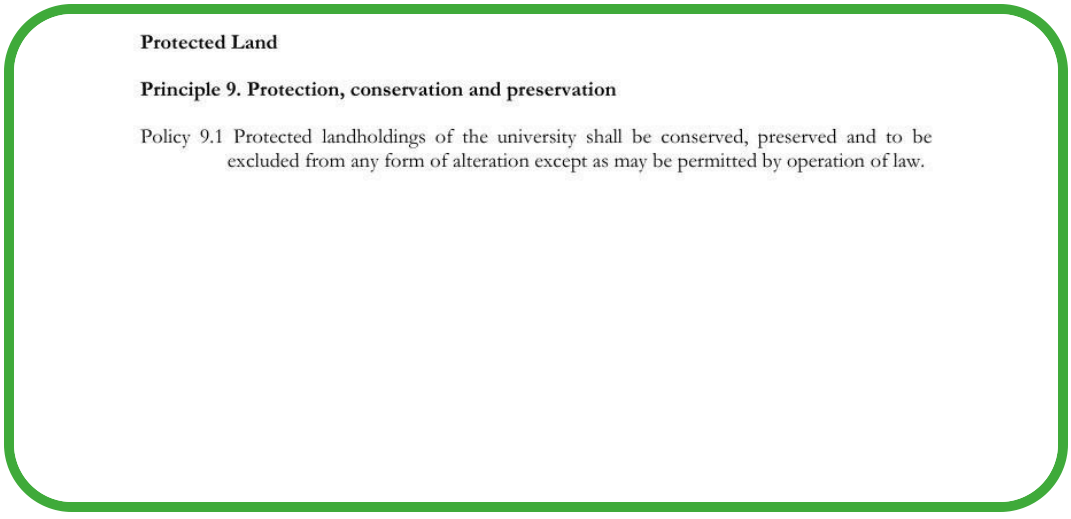

No 2025 item was found for this indicator. The material below predates 2025 and, as far as the public record shows, is still in place.

Continuing implementation

Policies and programmes that began before 2025 and continue to be implemented, with 2024 and 2026 activities that show the programme is ongoing. THE accepts policies that are already in place.

Sirmata 2040: Planning MMSU's Campuses and Reserve Lands for Two Decades

Plan · Sirmata 2040 LUDIP (2021), a 20-year plan

Protected Land

Principle 9. Protection, conservation and preservation

Policy 9.1 Protected landholdings of the university shall be conserved, preserved and to be excluded from any form of alteration except as may be permitted by operation of law.

Document: MMSU Zoning Policy, Protected Land (Principle 9, Policy 9.1), Sirmata 2040 LUDIP.

Sirmata 2040, MMSU's Land Use Development and Infrastructure Plan (LUDIP), is the university's 20-year guide for managing its land resources and infrastructure. Prepared under Republic Act 11396, which requires state universities and colleges to have a LUDIP, and supported by a Php 2 million grant from the Commission on Higher Education (CHED), the plan covers the future land

use of the MMSU campuses and the university's reserve areas in Nagbacsan, Payao, Lubbot and Sarnap, City of Batac, including the forest reserves where MMSU's forestry and agroforestry research is set up.

Local biodiversity is built into the plan's development rules. The zoning plan sets aside Protected Land, which "shall be conserved, preserved and to be excluded from any form of alteration except as may be permitted by operation of law" (Policy 9.1), and the MMSU Forest Reserve is kept as a no-build zone. Before any land is altered or converted, the plan requires a science-based assessment of its natural suitability and carrying capacity (Policies 7.1, 10.1 and 11.1).

The plan was developed through stakeholder consultations, sectoral studies and campus planning workshops, and was endorsed by the CHED Technical Working Group after validation visits to the campuses.
