MMSU's Commitment

Take an active role in protecting and promoting sustainable use of terrestrial ecosystems, responsible land use, and biodiversity conservation.

SDG 15.2.3 · Maintain and extend current ecosystems' biodiversity

Work directly to maintain and extend existing ecosystems and their biodiversity, of both plants and animals, especially ecosystems under threat.

Evidence year: 2025 (calendar year)

Enriching MMSU's 1,068-Hectare Forest Reserves with Native Species

MMSU manages Forest Reserve Areas in Barangays Lubbot and Payao, City of Batac, covering a total of 1,068.13 hectares, where the university's forestry and agroforestry research is set up. The university maintains and extends these ecosystems with planting stock raised in its own nurseries, the MMSU Central Nursery and the MMSU Bamboo Nursery.

On July 2, 2025, 230 CAFSD graduating students enriched the reserves with 120 seedlings of the native dipterocarps guijo and yakal in Payao and 130 propagules of kawayan tinik, machiku and giant bamboo in Mabaleng. The activity was led by CAFSD OIC-Dean Charlie Batin with the MMSU Bamboo Research and Development Center.

Conserving Ilocos Indigenous Food Plants In Situ, Ex Situ and Circa Situ

Partners receive indigenous food plant planting materials for the Community Foodscapes and Seedbanks, World Food Day 2025.

Through its Indigenous Food Plants (IFP) Program, MMSU conserves the wild and neglected food plants of Ilocos Norte, 46 of which were documented by the program in seven towns of the province. The program follows a triad of conservation approaches: an IFP Botanical Garden for ex situ conservation, a himbabao (alukon) genebank at the MMSU Forest Reserve, circa situ cultivation of the wild yams kamangeg and dolian, and the integration of IFPs into community foodscapes.

In October 2025, in celebration of World Food Day, the MMSU Extension and Research Directorates established the second batch of Community Foodscapes and Seedbanks for Indigenous Food Plants with local government units and schools, at Eladio V. Barangan Memorial Elementary School in San Nicolas, Ilocos Norte. The foodscape sites serve as seedbanks and learning gardens, and partner communities receive planting materials and technical assistance to cultivate kapaskapas, alokon, pako, dalayap, wild singkamas and roselle. The new partners join existing foodscape sites in Sarrat and Batac.

The IFP Program was adopted by the Regional Development Council of Region 1 as its first research and development initiative, and a study on the program by Dr. Menisa A. Antonio and co-authors won Best Paper in the Sustainable and Smart Agri-Aquaculture and Climate Resilience category of the SUC-ACAP 2025 Biennial Conference, held August 27–29, 2025, in Tagbilaran City, Bohol.

Dr. Arlene L. Gonzales at the MMSU–DENR Region 1 dialogue on mangrove conservation, ILAARRDEC.

Throughout 2025, MMSU implemented the DOST-PCAARRD-funded project "Nature-based Solutions (NbS) for Sustainable Mangrove Management and Resilient Coastal Communities Through Innovative Green Engineering Approach," led by Dr. Arlene L. Gonzales, in Badoc and Currimao, Ilocos Norte, with DENR-PENRO Ilocos Norte, the Provincial Government of Ilocos Norte and the LGUs of Badoc and Currimao. The project uses green engineering and locally available, ecologically friendly materials, including bamboo-engineered structures that protect young mangroves and improve their survival.

In 2025, MMSU and DENR Region 1 met at ILAARRDEC to advance the work, with DENR pledging technical support and active participation in restoration, monitoring and evaluation, and the project trained representatives of Currimao, Pasuquin, Badoc and Burgos in mangrove propagation, management and conservation on October 27–28, 2025.

On December 6, 2025, Mariano Marcos State University, the Rotary Club of Laoag Sunshine and the Local Government Unit of Badoc planted 280 mangrove propagules in Barangay Pagsanahan, Badoc, Ilocos Norte, to restore a mangrove stand extensively damaged by past typhoons and to ensure the continuity of ecological succession at the site.

The activity was led by MMSU President Virgilio Julius P. Manzano Jr., with the LGU of Badoc headed by Hon. Virgilio M. Calajate and the Rotary Club of Laoag Sunshine under Atty. Zsa Zsa Raval. MMSU's Vice President for Resource Generation and its Directors for Extension, Curriculum Development and Innovative Learning, and Student Affairs and Development also took part.

A New Bambusetum in Barangay Aglipay, Pinili

Participants of the bamboo propagation, nursery and plantation management training, Brgy. Aglipay, Pinili, 2025. (Photo: MMSU)

During a two-day bamboo production training in 2025, the MMSU Extension Directorate and CAFSD, with Barangay Aglipay, Pinili, and the support of ILAARRDEC, worked with 46 farmers, local leaders and community members to establish a new bambusetum, a collection of bamboo species, in Barangay Aglipay. The training covered bamboo propagation, nursery establishment and plantation management.
