15 LIFE ON LAND

THE ASKS

Have a policy, process or practice on waste disposal covering hazardous materials.

MMSU'S COMMITMENT

Take an active role in protecting and promoting sustainable use of terrestrial ecosystems, responsible land use, and biodiversity conservation.

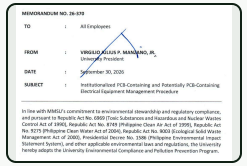

STORYLINE

A hazardous-waste pathway from generator to accredited disposal, with a 2026 memorandum making it explicit. No 2025 item.

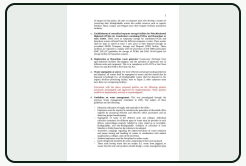

COMPENDIUM NOTE · CONTINUING ONLY

No 2025 item was found for this indicator. The material below is from before 2025 or from 2026 and, as far as the records show, is still in place.

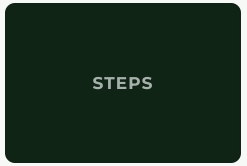

THE FILMSTRIP · 3 FRAMES

MEMORANDUM NO. 26-370
TO : All Employees
FROM : VIRGILIO AGUIS P. MANABNG, JR.
University President
DATE : September 30, 2026
SUBJECT : Institutionalized PCB-Containing and Potentially PCB-Containing Electrical Equipment Management Procedure
In line with MMSU's commitment to environmental stewardship and regulatory compliance, and pursuant to Republic Act No. 6969 (Toxic Substances and Hazardous and Nuclear Wastes Control Act of 1990), Republic Act No. 8749 (Philippine Clean Air Act of 1999), Republic Act No. 9275 (Philippine Clean Water Act of 2004), Republic Act No. 9003 (Ecological Solid Waste Management Act of 2000), Presidential Decree No. 1586 (Philippine Environmental Impact Statement System), and other applicable environmental laws and regulations, the University hereby adopts the University Environmental Compliance and Pollution Prevention Program;

MEMORANDUM NO. 26-370

TO : All Employees

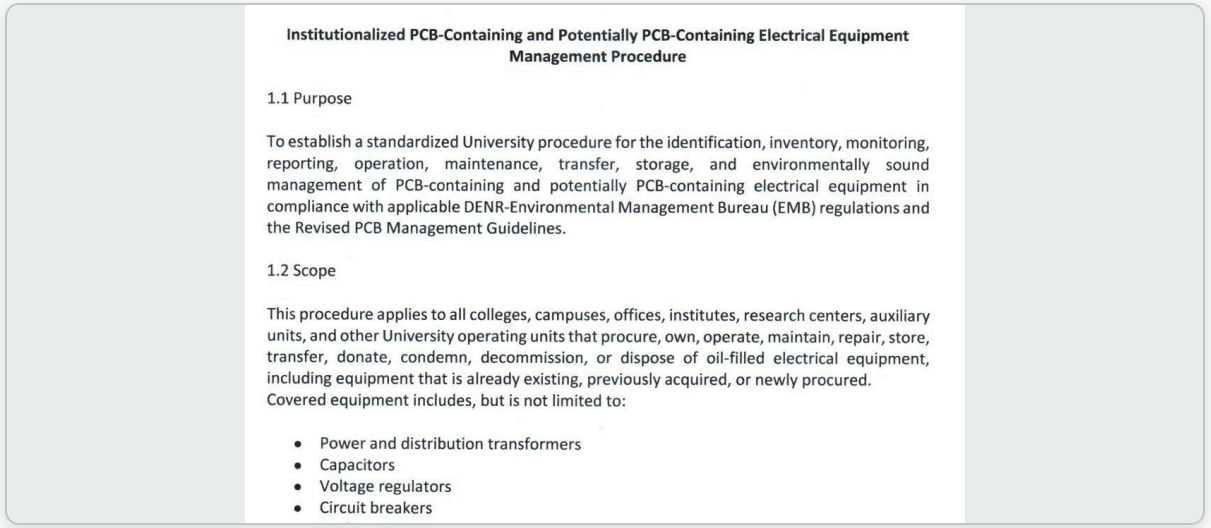

FROM : VIRGILIO JULIUS P. MANZANO, JR.
University President

DATE : September 30, 2026

SUBJECT : Institutionalized PCB-Containing and Potentially PCB-Containing Electrical Equipment Management Procedure

In line with MMSU's commitment to environmental stewardship and regulatory compliance, and pursuant to Republic Act No. 6969 (Toxic Substances and Hazardous and Nuclear Wastes Control Act of 1990), Republic Act No. 8749 (Philippine Clean Air Act of 1999), Republic Act No. 9275 (Philippine Clean Water Act of 2004), Republic Act No. 9003 (Ecological Solid Waste Management Act of 2000), Presidential Decree No. 1586 (Philippine Environmental Impact Statement System), and other applicable environmental laws and regulations, the University hereby adopts the University Environmental Compliance and Pollution Prevention Program.

Document: Office of the President Memorandum No. 26-370, 30 September 2026, adopting the University Environmental Compliance and Pollution Prevention Program.

Institutionalized PCB-Containing and Potentially PCB-Containing Electrical Equipment Management Procedure

1.1 Purpose

To establish a standardized University procedure for the identification, inventory, monitoring, reporting, operation, maintenance, transfer, storage, and environmentally sound management of PCB-containing and potentially PCB-containing electrical equipment in compliance with applicable DENR-Environmental Management Bureau (EMB) regulations and the Revised PCB Management Guidelines.

1.2 Scope

This procedure applies to all colleges, campuses, offices, institutes, research centers, auxiliary units, and other University operating units that procure, own, operate, maintain, repair, store, transfer, donate, condemn, decommission, or dispose of oil-filled electrical equipment, including equipment that is already existing, previously acquired, or newly procured.
Covered equipment includes, but is not limited to:

- Power and distribution transformers
- Capacitors
- Voltage regulators
- Circuit breakers

Document: attached procedure for PCB-containing and potentially PCB-containing electrical equipment (purpose, scope and inventory), Memorandum No. 26-370.

30 SEP 2026 · OFFICE OF THE PRESIDENT MEMORANDUM NO. 26-370

Memorandum No. 26-370 Institutionalizes MMSU's Environmental Compliance and Hazardous Waste Procedures

Continuing implementation · 30 September 2026

1 **THE MEMORANDUM**
President Manzano adopted the University Environmental Compliance and Pollution Prevention Program under RA 6969, 8749, 9275, 9003 and PD 1586, directing all offices, colleges, laboratories, research units and auxiliary enterprises to comply.

2 **WHAT IT COVERS**
Hazardous wastes, wastewater, air emissions, solid wastes and chemicals, with the permits, monitoring, reporting and inspections required by DENR-EMB.

3 **THE PCB PROCEDURE**
Every unit inventories PCB-containing equipment for the SFT Office, which validates it, keeps the central and DENR-EMB online inventories and inspects annually. Nothing is moved, repaired, condemned or disposed of without SFT written clearance; disposal only through DENR-accredited facilities.

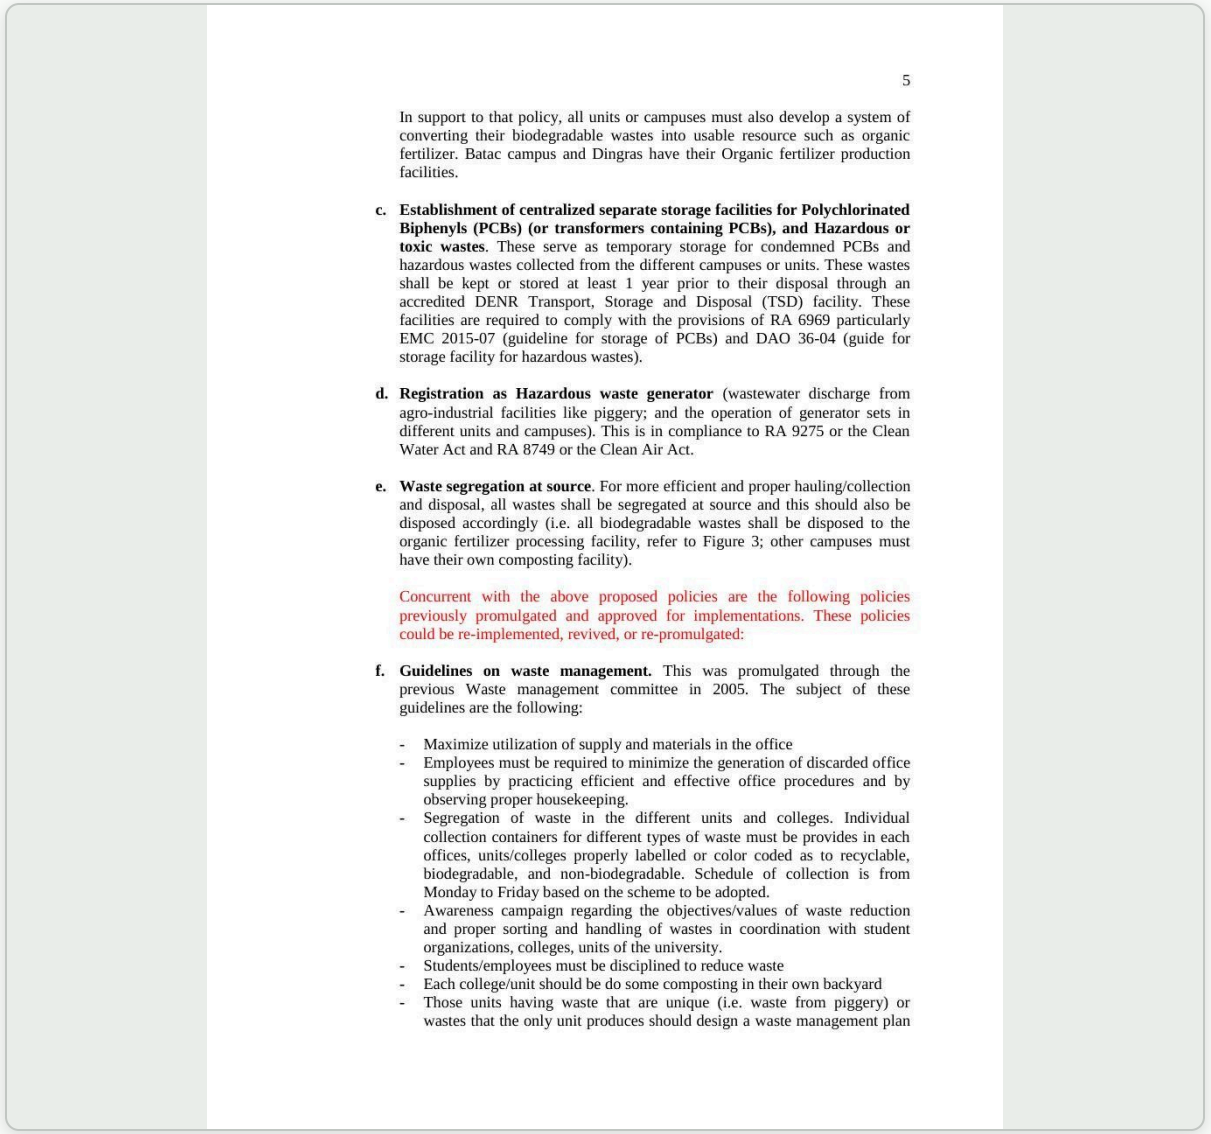

5

In support to that policy, all units or campuses must also develop a system of converting their biodegradable wastes into usable resource such as organic fertilizer. Batac campus and Dingras have their Organic fertilizer production facilities.

c. **Establishment of centralized separate storage facilities for Polychlorinated Biphenyls (PCBs) (or transformers containing PCBs), and Hazardous or toxic wastes**. These serve as temporary storage for condemned PCBs and hazardous wastes collected from the different campuses or units. These wastes shall be kept or stored at least 1 year prior to their disposal through an accredited DENR Transport, Storage and Disposal (TSD) facility. These facilities are required to comply with the provisions of RA 6969 particularly EMC 2015-07 (guideline for storage of PCBs) and DAO 36-04 (guide for storage facility for hazardous wastes).

d. **Registration as Hazardous waste generator** (wastewater discharge from agro-industrial facilities like piggery; and the operation of generator sets in different units and campuses). This is in compliance to RA 9275 or the Clean Water Act and RA 8749 or the Clean Air Act.

e. **Waste segregation at source**. For more efficient and proper hauling/collection and disposal, all wastes shall be segregated at source and this should also be disposed accordingly (i.e. all biodegradable wastes shall be disposed to the organic fertilizer processing facility, refer to Figure 3; other campuses must have their own composting facility).

Concurrent with the above proposed policies are the following policies previously promulgated and approved for implementations. These policies could be re-implemented, revived, or re-promulgated:

f. **Guidelines on waste management.** This was promulgated through the previous Waste management committee in 2005. The subject of these guidelines are the following:

- Maximize utilization of supply and materials in the office
- Employees must be required to minimize the generation of discarded office supplies by practicing efficient and effective office procedures and by observing proper housekeeping.
- Segregation of waste in the different units and colleges. Individual collection containers for different types of waste must be provides in each offices, units/colleges properly labelled or color coded as to recyclable, biodegradable, and non-biodegradable. Schedule of collection is from Monday to Friday based on the scheme to be adopted.
- Awareness campaign regarding the objectives/values of waste reduction and proper sorting and handling of wastes in coordination with student organizations, colleges, units of the university.
- Students/employees must be disciplined to reduce waste
- Each college/unit should be do some composting in their own backyard
- Those units having waste that are unique (i.e. waste from piggery) or wastes that the only unit produces should design a waste management plan

Document: Revised Integrated Pollution and Waste Management Program of MMSU, provisions on PCB and hazardous waste storage and registration.

POLICY · INTEGRATED POLLUTION AND WASTE MANAGEMENT PROGRAM (REVISED 2020)
PART 1 OF 2

Hazardous Waste Disposal under MMSU's Integrated Pollution and Waste Management Program

Policy · Integrated Pollution and Waste Management Program (revised 2020)

1 **THE PROGRAMME**
The Integrated Waste Management Program was revised in 2020 into the IPWMP to cover hazardous materials, implemented by the Pollution Control Unit and the General Services directorate.

2 **FOCAL PERSONS**
Assigned for hazardous wastes (chemical and related), air and water pollution, solid wastes, and PCBs and related industrial wastes.

3 **UNIT COORDINATORS**
The waste coordinators of every unit must store and label generated hazardous wastes properly before collection.

2020
revised

4
focal-person areas

IPWMP hazardous waste pathway, as described in the compendium

1. **Generate**
   Units are registered as hazardous waste generators
2. **Store and label**
   Unit waste coordinators, before collection
3. **Centralised storage**
   Separate facilities for PCBs and other hazardous or toxic wastes from the campuses
4. **Up to one year**
   Kept per RA 6969 and its storage guidelines
5. **Dispose**
   Through a DENR-accredited transport, storage and disposal facility, coordinated with DENR-EMB

PROCESS · FROM GENERATION TO ACCREDITED DISPOSAL PART 2 OF 2

The Process: Registered Generators, Central Storage, Accredited Disposal

Policy · Integrated Pollution and Waste Management Program (revised 2020)

1. **POLICY**
   The IPWMP (revised 2020) sets the rules and assigns responsibility.
2. **PROCESS**
   Registration, labelling, centralised storage of up to one year and disposal through DENR-accredited facilities, in compliance with RA 6969.
3. **PRACTICE**
   Memorandum No. 26-370 (30 Sep 2026) adds a PCB inventory, written SFT clearance for any equipment move or disposal, and manifests and certificates of treatment kept on record.

RECOMMENDED ANSWER ON THE THE FORM

Yes (continuing policy)

CONTINUING ONLY

DRAFT COMMENT 674 / 1,000 characters

MMSU's Integrated Pollution and Waste Management Program (revised 2020) assigns focal persons for hazardous, air, water, solid and PCB wastes; unit waste coordinators store and label hazardous wastes; units are registered hazardous waste generators; wastes are held in centralised, separate storage for up to one year under RA 6969 before disposal through a DENR-accredited transport, storage and disposal facility. Memorandum No. 26-370 (30 Sep 2026) adds a PCB inventory, written clearance from the SFT Office before any equipment is moved or disposed of, and records of manifests and certificates of treatment. mmsu.edu.ph/resources/1fNUCZwyOozOKO27L2Bm6pNN-P_cJNpLd/view

POLICY YEARS (THE FORM ASKS FOR BOTH)

Created (yyyy)
2020 (IPWMP revision); the 2026 form entered 2021: confirm

Reviewed (yyyy)
Memorandum No. 26-370, 30 Sep 2026

BEFORE YOU SUBMIT

- Confirm the policy is still in force and obtain the full Environmental Compliance Procedures under Memorandum No. 26-370.
- Peer benchmark: a dated 2025 memorandum or review would add the review point.
- Confirm the 2020 vs 2021 revision year.
- Confirm the 2027 data year with THE before upload.
- Upload one file per indicator (this storyboard is built for that). THE rejects evidence that is mainly a list of links.
