### New Research Greenhouse and Staff Training Support Controlled-Environment Crop Production on Campus

On May 13, 2025, eighteen researchers and farm workers of Mariano Marcos State University took part in hands-on training on the operation and management of the newly constructed greenhouse in the university's research, development and extension (RDE) complex. The training, facilitated by the project contractor as part of the turnover, covered the basic functions and systems of the greenhouse and crop-specific management strategies; a follow-up session on May 20, 2025 covered the preparation of planting solutions for soilless and hydroponic systems.

The Php 2.2-million facility measures 10 by 6 metres and 6.1 metres high, uses combined mechanical and natural ventilation, and has an integrated planting system in three bays for soilless cultivation, hydroponics and soil-based planting. It was built under the Higher Education Reform and Innovation Program (HERIP) to strengthen research in controlled-environment agriculture and to give students immersive learning.

On February 14, 2025, to close its 47th Foundation Anniversary, MMSU held the 7th Parambak ditoy MMSU in front of the College of Agriculture, Food and Sustainable Development, highlighting the impact of its extension and research programmes on community development and agricultural innovation. Thirty-seven exhibitors took part, including learning sites of the Agricultural Training Institute–Ilocos Region, Magsasaka Siyentista (farmer scientists), Balik-Probinsya beneficiaries and local government units, and the Research Directorate gave a speed talk on MMSU technologies such as off-season tomato and shallot production, Bolinao chicken, indigenous vegetables and black garlic.

Participants harvested fresh vegetables at the President's Farm, 17 new partners of the Extension Directorate received certificates of appreciation, and beneficiaries shared how MMSU's technologies had supported sustainable agriculture. Attendees included the Provincial Government of Ilocos Norte, LGUs, non-government organisations, farmer leaders, entrepreneurs and MMSU-assisted beneficiaries. Incoming President Virgilio Julius P. Manzano Jr. urged the units concerned to sustain sustainable farming practices.
