2 · Indicators to report

SDG 15 · Life on Land · data year 2025

Indicator	Description
15.4.3	Policy on hazardous waste disposal. Policy, process or practice on waste disposal covering hazardous materials.

3 · Optional: what other universities submit

What other universities claim for this indicator, and where MMSU might hold the same kind of evidence.

University	What it submits (indicator and type of evidence)	What to look for at MMSU
Caraga State University	15.4.3: dated memorandum on hazardous waste (Memo No. 50, s. 2024) with EMB seminars	A 2025 memorandum or review would add the review point; Memorandum No. 26-370 (30 Sep 2026) is the latest.

[Add the THE edition and URL for each result before using this page.]

4 · Evidence by indicator

SDG 15.4.3 · Policy on hazardous waste disposal

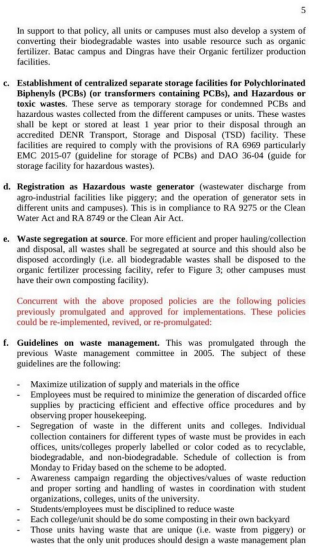

Have a policy, process or practice on waste disposal covering hazardous materials.

Evidence year: in place by 2025

Submission pick: Hazardous Waste Disposal page, https://www.mmsu.edu.ph/resources/1jo6-3cVqxRAIllIxEhnSCgyT5ef5LGOW/data Memorandum No. 26-370 (30 Sep 2026) has no public page yet.

Hazardous Waste Disposal under MMSU's Integrated Pollution and Waste Management Program

IPWMP revised in 2020; in force by the data year.

5

In support to that policy, all units or campuses must also develop a system of converting their biodegradable wastes into usable resource such as organic fertilizer. Batac campus and Dingras have their Organic fertilizer production facilities.

c. **Establishment of centralized separate storage facilities for Polychlorinated Biphenyls (PCBs) (or transformers containing PCBs), and Hazardous or toxic wastes**. These serve as temporary storage for condemned PCBs and hazardous wastes collected from the different campuses or units. These wastes shall be kept or stored at least 1 year prior to their disposal through an accredited DENR Transport, Storage and Disposal (TSD) facility. These facilities are required to comply with the provisions of RA 6969 particularly EMC 2015-07 (guideline for storage of PCBs) and DAO 36-04 (guide for storage facility for hazardous wastes).

d. **Registration as Hazardous waste generator** (wastewater discharge from agro-industrial facilities like piggery; and the operation of generator sets in different units and campuses). This is in compliance to RA 9275 or the Clean Water Act and RA 8749 or the Clean Air Act.

e. **Waste segregation at source**. For more efficient and proper hauling/collection and disposal, all wastes shall be segregated at source and this should also be disposed accordingly (i.e. all biodegradable wastes shall be disposed to the organic fertilizer processing facility, refer to Figure 3; other campuses must have their own composting facility).

Concurrent with the above proposed policies are the following policies previously promulgated and approved for implementations. These policies could be re-implemented, revived, or re-promulgated:

f. **Guidelines on waste management.** This was promulgated through the previous Waste management committee in 2005. The subject of these guidelines are the following:

- Maximize utilization of supply and materials in the office
- Employees must be required to minimize the generation of discarded office supplies by practicing efficient and effective office procedures and by observing proper housekeeping.
- Segregation of waste in the different units and colleges. Individual collection containers for different types of waste must be provides in each offices, units/colleges properly labelled or color coded as to recyclable, biodegradable, and non-biodegradable. Schedule of collection is from Monday to Friday based on the scheme to be adopted.
- Awareness campaign regarding the objectives/values of waste reduction and proper sorting and handling of wastes in coordination with student organizations, colleges, units of the university.
- Students/employees must be disciplined to reduce waste
- Each college/unit should be do some composting in their own backyard
- Those units having waste that are unique (i.e. waste from piggery) or wastes that the only unit produces should design a waste management plan

Document: Revised Integrated Pollution and Waste Management Program of MMSU, provisions on PCB and hazardous waste storage and registration.

Policy title	Integrated Pollution and Waste Management Program (IPWMP)
Approved by	[to add]
Reference no.	[to add]
Date approved or last reviewed	2020 (compendium). The 2026 form entered 2021: confirm the year. Last reviewed: [to add]
Section that answers the question	Hazardous waste provisions: focal persons, labelling, central storage, DENR-accredited disposal (RA 6969)

MMSU's Integrated Waste Management Program was revised in 2020 into the Integrated Pollution and Waste Management Program (IPWMP), implemented by the Pollution Control Unit and the General Services directorate, to cover hazardous materials. The IPWMP assigns focal persons for hazardous wastes (chemical and related wastes), air and water pollution, solid wastes, and PCBs and related industrial wastes, and requires the waste coordinators of every unit to store and label generated hazardous wastes properly before collection.

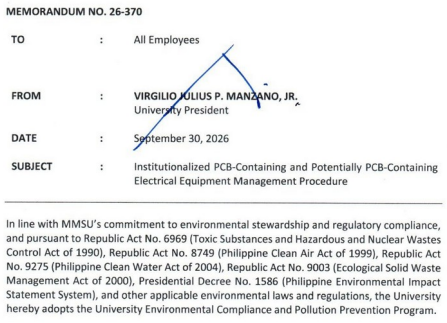

The program establishes centralized, separate storage facilities for polychlorinated biphenyls (PCBs) and other hazardous or toxic wastes collected from the campuses, where the wastes are kept for up to one year before disposal through a DENR-accredited transport, storage and disposal facility, in compliance with Republic Act 6969 and its storage guidelines. Units that generate hazardous waste are registered as hazardous waste generators, and the university coordinates with the Environmental Management Bureau of DENR for final collection and disposal.

Memorandum No. 26-370 Institutionalizes MMSU's Environmental Compliance and Hazardous Waste Procedures

Dated 30 September 2026, after the data year. Internal evidence only; no public page yet.

MEMORANDUM NO. 26-370

TO : All Employees

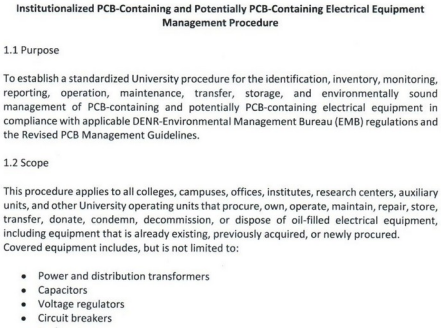

FROM : VIRGILIO JULIUS P. MANZANO, JR.
University President

DATE : September 30, 2026

SUBJECT : Institutionalized PCB-Containing and Potentially PCB-Containing Electrical Equipment Management Procedure

In line with MMSU's commitment to environmental stewardship and regulatory compliance, and pursuant to Republic Act No. 6969 (Toxic Substances and Hazardous and Nuclear Wastes Control Act of 1990), Republic Act No. 8749 (Philippine Clean Air Act of 1999), Republic Act No. 9275 (Philippine Clean Water Act of 2004), Republic Act No. 9003 (Ecological Solid Waste Management Act of 2000), Presidential Decree No. 1586 (Philippine Environmental Impact Statement System), and other applicable environmental laws and regulations, the University hereby adopts the University Environmental Compliance and Pollution Prevention Program.

Document: Office of the President Memorandum No. 26-370, 30 September 2026, adopting the University Environmental Compliance and Pollution Prevention Program.

Institutionalized PCB-Containing and Potentially PCB-Containing Electrical Equipment Management Procedure

1.1 Purpose

To establish a standardized University procedure for the identification, inventory, monitoring, reporting, operation, maintenance, transfer, storage, and environmentally sound management of PCB-containing and potentially PCB-containing electrical equipment in compliance with applicable DENR-Environmental Management Bureau (EMB) regulations and the Revised PCB Management Guidelines.

1.2 Scope

This procedure applies to all colleges, campuses, offices, institutes, research centers, auxiliary units, and other University operating units that procure, own, operate, maintain, repair, store, transfer, donate, condemn, decommission, or dispose of oil-filled electrical equipment, including equipment that is already existing, previously acquired, or newly procured.
Covered equipment includes, but is not limited to:

- Power and distribution transformers
- Capacitors
- Voltage regulators
- Circuit breakers

Document: attached procedure for PCB-containing and potentially PCB-containing electrical equipment (purpose, scope and inventory), Memorandum No. 26-370.

Policy title	Memorandum No. 26-370, University Environmental Compliance and Pollution Prevention Program
Approved by	University President Virgilio Julius P. Manzano Jr.
Reference no.	26-370
Date approved or last reviewed	30 September 2026
Section that answers the question	Environmental Compliance Procedures; PCB-containing equipment procedure

On September 30, 2026, University President Virgilio Julius P. Manzano Jr. issued Memorandum No. 26-370 to all employees, adopting the University Environmental Compliance and Pollution Prevention Program under Republic Act 6969 (Toxic Substances and Hazardous and Nuclear Wastes Control Act), Republic Act 8749 (Clean Air Act), Republic Act 9275 (Clean Water Act), Republic Act 9003 (Ecological Solid Waste Management Act) and Presidential Decree 1586 (Environmental Impact Statement System). The memorandum covers the management of hazardous wastes, wastewater, air emissions, solid wastes and chemicals, together with permits, monitoring, reporting and inspections required by the Department of Environment and Natural Resources – Environmental Management Bureau (DENR-EMB), and directs all offices, colleges, laboratories, research units and auxiliary enterprises to comply with the attached Environmental Compliance Procedures.

The attached procedure for PCB-containing and potentially PCB-containing electrical equipment, such as transformers, capacitors, voltage regulators, circuit breakers, reclosers and oil-filled switches, requires every unit to inventory its equipment and submit the inventory to the Sustainability and Futures Thinking (SFT) Office. The SFT Office validates the inventory, keeps the university's central PCB inventory and the DENR-EMB online PCB inventory, ensures labelling, conducts inspections and annual inventory validation, and prepares the reports required by DENR-EMB. No covered equipment may be relocated, transferred, repaired through oil handling, decommissioned, condemned or disposed of without the SFT Office's written clearance, and PCB wastes and equipment may be disposed of only through DENR-accredited transporters, treaters and disposal facilities. The SFT Office keeps hazardous waste manifests and certificates of treatment or disposal among its records.
